The new X-Store 2.0

The new X-Store 2.0 for improved warehouse safety

The new and improved X-Store 2.0 is a flexible modular concept that is easy to assemble and adapt. Let us explain its advantages and how it works.

The new X-Store 2.0 simplifies and ensure stock keeping. But it has several more advantages too. How about the possibility to add a ceiling, dismantling a panel without affecting the panels surrounding it, or by having flexible posts making it possible to build in three different directions including corners?

You can use new X-Store 2.0 either without or with a roofing system:

Standard: X-Store 2.0: Without roofing system

The new X-Store 2.0 replaces the present X-Store and Flexi store and is perfect to use to when building wall sections within warehouses or other industrial applications. Use it for dividing areas or to build restricted rooms. Many new smart features have been added in order to create more value to the system.

Additional: X-Store 2.0: With roofing system

When you require a secure way to store high-value items, and/or items which requires extra safety in their warehouse, for example tools, electronics, consumables etc. X-Store 2.0 provides a great solution to make sure the items only are accessible for authorized staff. The roofing has a maximum width of six meters, but no limitations regarding length. This make it possible for you to choose a system that is optimal for your warehouse.

The advantages with X-Store 2.0

- The possibility to add roofing system in unlimited length
- Easily dismantle a panel without affecting the panels surrounding it
- A new and unique way to attach the panels to the post
- Flexible posts; build in 3 different directions including corners
- New joints for smoother and stronger vertical assembly
- Since it is available in SnapperWorks, you can easily design it to fit your needs. The X-Store 2.0 wide range of locks and doors are based on X-Guard's range.
